SIGN UP

User that fills in his nick and password correctly, will be allowed to use the app.

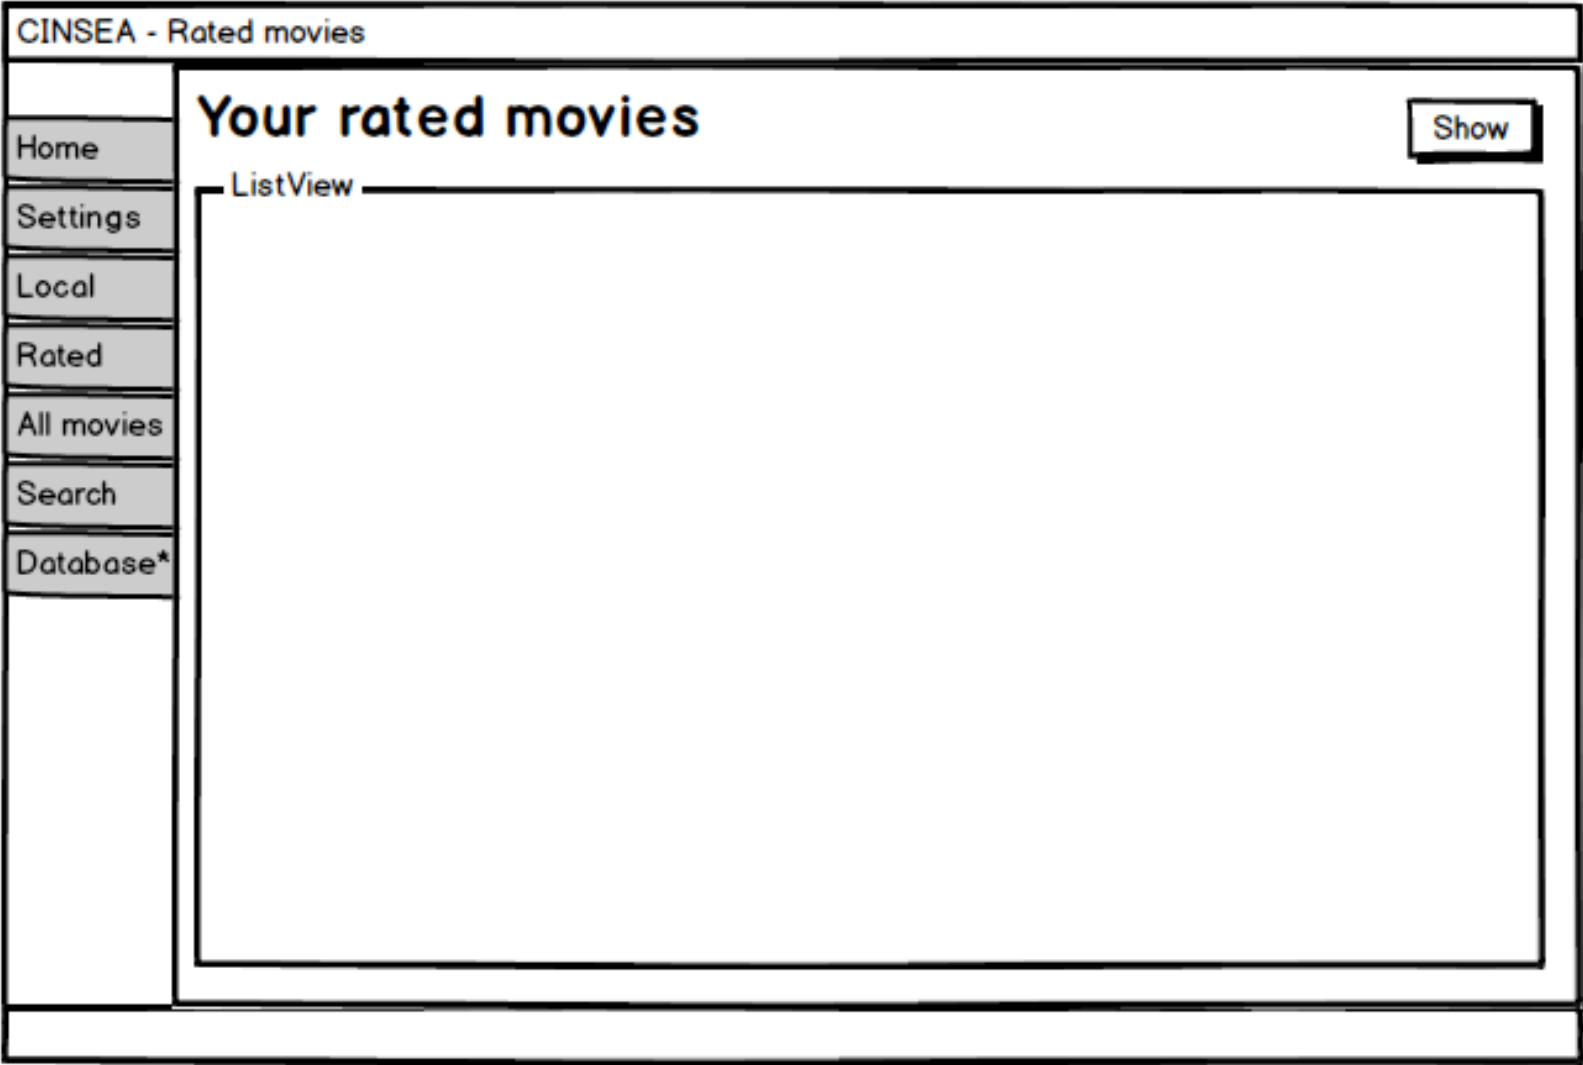

Home window will be a welcome page with our big logo. On the right side of the application will be a menu where you can switch between several pages.

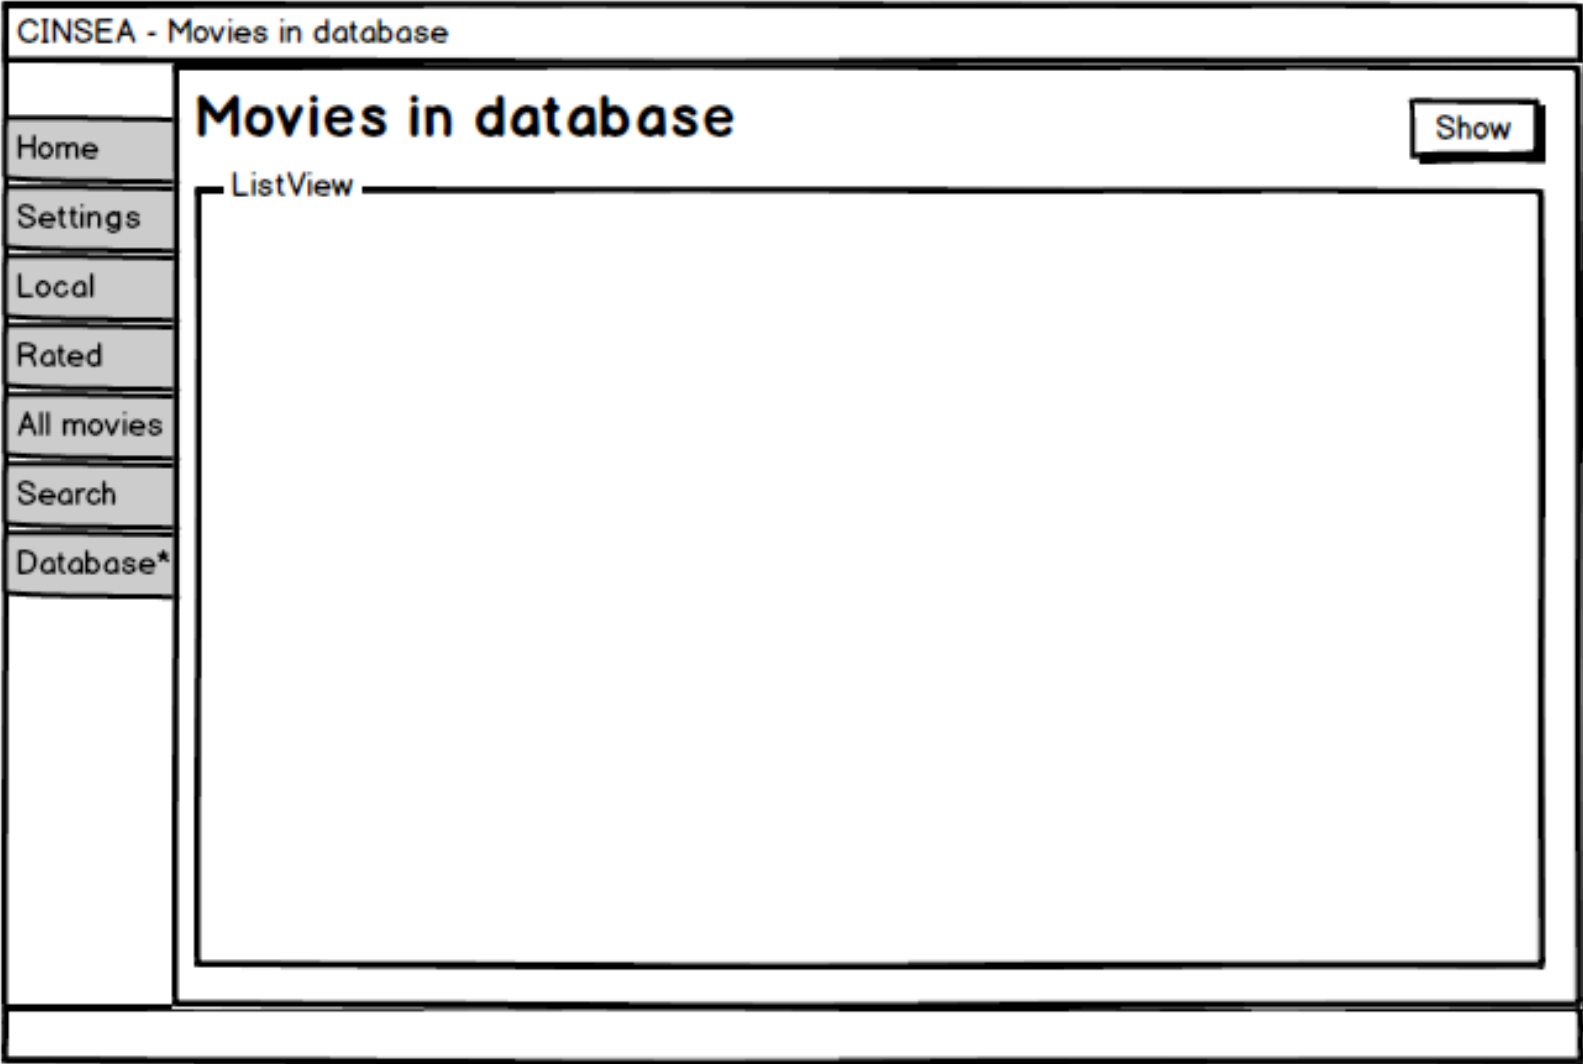

In the settings you can add paths of your stored movies and serials. These movies will be added to your library and compared with our database to identify common movies/serials.

This page will show you a list of your stored movies. You will be able to display all or just identified movies. This page can be also called as your personal "Library".

This page shows a list of movies that user rated.

Page shows list of all movies that are in our database.
